## i-PRO SmartHD Basic Concept

**One Panasonic**  
Wider Selection, Higher Performance

**SmartHD Package**  
SmartHD Package that Suits for Every User

**IP Migration**  
Seamless Operation between Analog / IP devices

*To implement long distance, high speed digital data transmission on existing coaxial cabling with low setup costs.*

# Description:

The BY-HPE11KT is a coaxial - LAN converter capable of implementing long distance, high speed digital data transmission on existing coaxial cabling with low setup costs. With the built-in PoE function, the BY-HPE11KT is able to supply power to Panasonic network cameras, which eliminates the need for installing power outlets for the cameras.

## Key Features

- Compliant with PoE standards (IEEE 802.3af)
- Contains a power supplying device
- Eliminates the need for installing power outlets for the cameras.
- implements long distance, high speed digital data transmission on existing coaxial cabling with low setup costs.
- High speed transmission : 35Mbps to 45 Mbps
- No setup required, connexion automatically established
